Flexible Software for Flexible Carriers

New Alliance Between Profit Tools and Charter Capital Provides Software Services with Account Receivable Funding

Trucking companies benefit from increased cash flow and trucking software from Profit Tools when they factor with Charter Capital.

Profit Tools, Inc. and Charter Capital, a specialized financial services company, have teamed up to provide factoring services with the added benefit of Profit Tools fleet management software. Trucking companies that choose to factor with Charter Capital will get Profit Tools software at no additional cost.

The partnership gives trucking companies the tools they need to strengthen their business during tough economic times. Factoring with Charter Capital turns accounts receivable into immediate cash flow and gives them funds to grow their business. Profit Tools software provides business automation solutions to further increase cash flow, speed up billing and dispatch processes, and improve overall operational efficiency.

"By choosing to factor with Charter Capital trucking companies can get the benefits of a market competitive factoring rate and use of the Profit Tools system at no additional cost," said Brian Widell, President of Profit Tools, Inc. "Existing Profit Tools customers can also take advantage of this offer to add seats or new modules to their system."
